01 / THE MOMENT

The supplier called.
“We never got your money.”

You paid the “updated” bank account. Now what?

Mgadi / The first hour, guided.

02 / THE STAKES

R70 000

Stock. Wages. Next week.

ILLUSTRATIVE SCENARIO · NOT A MEASURED LOSS

THE OWNER IS THINKING

"Do I call the bank?
The supplier?
Who do I tell first?"

Pressure makes the next step harder.

03 / THE RESPONSE GAP

Knowing who to call shouldn’t be another crisis.

01

Bank

Payment response

02

Supplier + IT

Confirm and contain

03

Next responder

Incident record

Help exists. The owner still has to find the order.

04 / THE SOLUTION

From panic to a safe next step.

Phone-first guidance after a suspected payment-diversion scam.

Describe

Your own words

Act

Bank action available immediately

Record

Timeline + local file fingerprints

No installation. No account. No password or OTP request.

05 / LIVE PROOF

Watch the scam try to give instructions.

1 MASK

Show what leaves the browser

2 RESIST

Fake instructions cannot write actions

3 CHECK

Change a pack value; check fails

LIVE DEMO · Synthetic data · No real calls · State rules or AI mode

06 / WHY THIS DESIGN MATTERS

The model sorts.
The playbook guides.

MASK FIRST	Supported patterns + names supplied by owner
RESTRICT OUTPUT	One label + confidence; reject other fields
KEEP CONTROL	Local actions and contact directory; rules fallback

Draft playbook: practitioner review pending. Redaction is not guaranteed anonymisation.

07 / EVIDENCE, WITH ITS LIMITS

Working prototype. Early evidence.

7 / 7

Automated tests pass

Current entry test suite

7 / 7

Synthetic rules cases

Fixed developer smoke set

0 / 2

Unsafe diversion misses

Two payment-diversion cases

Next proof: fresh descriptions + timed tests with owners.
Live AI accuracy and real-world impact have not been measured.

LOCAL VALIDATION · 27 OCT 2026 · npm test / npm run scoreboard · Prototype results, not a general accuracy claim

08 / VALUE

Calm for the owner.
Clarity for the next responder.

OWNER

Less to work out

One action at a time, on the phone they already have.

BANK / IT / INSURER

A clearer starting record

A timeline and evidence fingerprints, with originals kept by the owner.

Designed benefits to test. Mgadi cannot guarantee recovery or responder acceptance.

09 / REACH AND SUSTAINABILITY

Free in a crisis. Partners fund readiness.

REACH

Start with accountants and SMME associations.

BENEFIT

A free emergency workflow for owners.

FUND

Test sponsored access and paid readiness tools.

Proposed model. No signed partnerships, paid plans or willingness-to-pay validation yet.

10 / THE ASK

The first hour shouldn’t feel like you’re alone.

Help us turn a working prototype into a tested service.

1	**Practitioner to review the playbook**
10	**Small businesses to test the workflow**

Chuma Meyiswa + Dalindyebo Mdledle / Team soloDolo

APPENDIX A / DATA BOUNDARY

What stays. What can leave.

ON THE DEVICE

Original story and evidence file bytes

File fingerprints + incident pack

Names supplied for masking

API / OPTIONAL AI

Masked description for classification

Validated label + confidence returned

No uploaded evidence files

Limits: residual personal data is possible. The downloaded pack includes the original story and any business details entered; share it deliberately.

APPENDIX B / PROTOTYPE BOUNDARIES

What we can claim today.

Built	Rules triage; optional AI adapter; bank links; local fingerprints; pack/checksum.
Pending	Practitioner review; phone HTTPS test; held-out AI evaluation; timed owner tests.
Not promised	Recovery; genuine-evidence proof; legal admissibility; automated calls; full offline reload.

A checksum can be recomputed by an attacker. A successful check is not proof of authenticity.

APPENDIX C / BRAND SYSTEM

Calm enough to think. Clear enough to act.

Forest	Ivory	Amber	Urgent	Complete
#123C35	#F7F4EC	#E9B44C	#AD352C	#237348
Foundation	Reading	Emphasis	Bank action	Checked state

Aptos / Segoe UI · One message per slide · Large type · Status always has words

APPENDIX D / SOURCES AND BASIS

Grounded in the entry, not invented traction.

Existing deck	Downloads / Mgadi_HackSecure_2026_Pitch.pdf · 19 Oct 2026
Submission criteria	Downloads / HackSecure_2026_Submission_Pack- Business Canvas Model.pdf · p.2 Submission-stage criteria; final-stage scoring and pitch limit unconfirmed.
Product status	build/entry/SOURCE-OF-TRUTH.md + current implementation · 27 Oct 2026
Validation	build/entry: npm test; npm run scoreboard · 27 Oct 2026
Claim discipline	Illustrative R70 000 scenario; synthetic demo files; no market-size, fraud-loss or recovery claims.
